True WDR performance(150dB)

Conventional WDR captures images by taking 2 frames taken at different exposures, whereas Wisenet X series cameras utilize 4 frame capture at different exposure levels to create a combined image. With the development of cutting-edge WDR technology, Wisenet X series cameras address a limitation found in conventional WDR cameras while producing clear and vivid images.

Conventional

Wisenet X series

※ 150dB WDR only available in 2MP X series

Digital Image Stabilization(DIS) with built-in Gyro sensor

Advances in Wisenet image stabilization technology allows the reduction of motion blur caused by wind or vibration. A gyroscopic sensor plus DIS technology is specifically added to the Wisenet X series cameras for more accurate stabilization.

extraLUX provides clear and colored images, even in low-light environments

Wisenet X series achieves optimal performance in low-light conditions by producing crystal-clear and true-color images without IR LEDs, regardless of the environment or time of day. The extraLUX series (XNO-6085R, XND/XNV-6085(V)) feature outstanding F0.94 lens with the 1/2" CMOS sensor, capturing vivid color images even in low-light environments.

Improve bandwidth by using WiseStream II

Using WiseStream II, Hanwha Techwin's original video compression technology, the Wisenet X series reduces data by up to 99% compared to current H.264 technology, when combined with H.265 compression. System costs are also greatly reduced without comprising image quality.

WiseStream II OFF : 7160kbps **WiseStream II ON : 74kbps**

WiseStream II OFF : 7260kbps **WiseStream II ON : 1817kbps**

More convenient installation with USB

Using the USB port, the installer can easily connect Wisenet X series cameras and mobile devices through Wi-Fi. Viewing and adjusting camera angles can be done immediately after installation by using a smartphone. No additional devices are required, saving both time and money.

Dual SD slots

Dual SD slots allow up to 512 GB to be saved automatically to the camera, keeping data safe in the event of an unstable network. Obviously this allows to record more video footage than single SD slot.

Handover to PTZ

The handover feature allows a camera* to receive an alarm(motion detection) from Wisenet X series camera operating on the same IP video surveillance system. Once the notification is received, the PTZ camera will zoom into the assigned camera pre-set location.

*PNP-9200RH / XNP-6370RH

Fog detection

Wisenet X series delivers outstanding image quality in foggy weather with Fog detection. Any change in an image is automatically detected with the defog function to provide a clear image.

Enhanced Video / Audio Analytics

Wisenet X series support a variety of exclusive Video and Audio Analytics, providing enhanced monitoring solutions and market intelligence.

Loitering detection

This feature detects when an object remains in a designated area longer than the time threshold set by the user.

Queue management

This feature provides statistical analysis and measurement for average dwell time and number of people in a queue. This insight is critical for businesses to manage their operations more efficiently, while providing the insight necessary to manage campaigns, displays and promotions throughout retail locations.

Sound classification

Wisenet X series cameras help users respond immediately in dangerous situations, by classifying sounds such as gunshot, glass breakage, scream and explosion.

WISeNET P series

Premium cameras with the most advanced technology

Wisenet P series, the ultimate premium cameras designed with the most advanced technology, delivers users an outstanding video surveillance solution.

From bullet cameras to multi-sensor cameras, the P series have a wide range of products optimized for applications which require extreme details and wide area coverage.

4K Premium Cameras

Exceptional Image Quality of 4K Ultra HD

The Wisenet P series provides an enhanced surveillance system by producing superior 4K Ultra HD image quality. 4K Ultra HD has four times the resolution of standard 1080p, which means it is able to show more detail.

PNO/PND/PNV-9080R, PNP-9200RH

Improved Bandwidth with WiseStream technology

The streaming performance is greatly enhanced when applying WiseStream combined with H.265, improving the bandwidth efficiency by up to 75% compared to current H.264 technology.

Multi-Sensor Cameras

Cover wide areas with multi-sensor cameras

The 4K UHD cameras provide an enhanced surveillance system by producing superior image quality and detailed visual output which has four times the resolution of standard 1080p.

Multi-directional Cameras

The four sensors move independently on top of the tracks enabling users to monitor a complete 360° view without any blind spots.

Multi-directional Camera with PTZ

Monitor a 360° wide area with the multi-directional camera while the PTZ camera zooms into the desired area.

Panoramic Cameras

Panoramic cameras provide a wide panoramic view within a single camera instead of installing 4 cameras. It offers a seamless single image by merging 4 images from each sensors.

WISENET T series

Specialized Cameras for Challenging Conditions

T series offers explosion proof and thermal cameras which ensure a reliable video surveillance system even in the most challenging conditions. The explosion proof cameras can be used in heavy industrial facilities where a single spark may cause an explosion, while the thermal cameras are suitable for detecting people and objects in difficult weather conditions.

Explosion-proof Cameras

Explosion Proof Cameras for Hazardous Environments

Wisenet T series explosion proof cameras can be used in heavy industrial facilities such as gas pipelines, petrochemical plants or oil refineries which are potentially explosive because of flammable gases and dusts emitted.

TNU-6320E

TNO-6320E

Stainless Steel 316L Enclosure to Prevent Explosions

The ATEX certified enclosure made of stainless steel 316L housing has the ability to contain any internal explosions or prevent sparks from escaping the device which may lead to a disaster.

Thermal Cameras

Detect People and Objects 24/7 with Thermal Cameras

Wisenet thermal imaging technology provides high contrast images based on temperature differences between the object and background, enabling users to detect incidents more easily in challenging environments.

Radiometric Cameras

The radiometric cameras detect the temperature range of -20°C to $+130^{\circ}\text{C}$ and send alarms when the temperature is above or below a defined value. Using the hybrid color palette, a preset temperature range can be displayed in vivid colors, helping users observe monitoring areas with greater ease.

Positioning Cameras

TNU-4051T/4041T combine a thermal imaging camera and a positioning unit to monitor a broad range, with its 360° pan and -90° to $+40^{\circ}$ tilt. The camera's flexibility is increased by 300 preset positions, allowing users to save the settings to view the location desired.

Convenience for everyone Wisenet SSM 2.1

Wisenet SSM is video management software with features for both traditional and contemporary surveillance operations. It mainly consists of two parts; server and client software giving users a simple and easy to expand architecture. On the other hand, client software provides PC console for operators in security room and mobile viewer for guards on the move.

Key Features

- **Single Core Server with Clustering**

Wisenet SSM has one Core Server merging multiple basic servers such as MG, RS, SM, and HA. The Core Servers can also be clustered together providing a higher degree of reliability.

- **Free Trial License**

Users are given a 45 days trial period before they can start activating their license. During the trial, full features are available for use including recording. After the trial, Wisenet SSM will generate a warning message and only limited features will be available.

- **New Client User Interface**

With Wisenet SSM's user friendly interface, operators can playback video during live streaming and easily control playback with new timeline control.

- **Distributed Computing Architecture**

Wisenet SSM's modular architecture allows the software to effectively manage any system, from low-end solutions to enterprise level installations.

- **Extended Scalability**

Wisenet SSM is suitable for both small and larger installations, with numerous features for enterprise systems including Federation, Transaction Server and 3rd party integration.

- **Flexible System Architecture**

The Transaction Server functionality provides easy integration with third party systems, including access control and intrusion detection.
