

## The Pet Immune PIR for Residential Security

Introducing the Capture PET detector - your ideal choice for delivering reliable security in homes with large pets. Engineered to offer superior pet immunity, this advanced PIR sensor ensures fewer false alarms and smoother installations.

### Key Features and Benefits:

- **Advanced Pet Immunity**

**Tailored for Pets:** Reduces false alarms caused by large animals, ensuring accurate detection of potential intruders.

- **Wide Coverage**

**15m / 90° Volumetric Coverage:** Monitors a broad area, making it suitable for larger spaces and open floor plans.

- **Precision Detection**

**Dual Element Pyro Sensor.** Offers precise motion detection and minimises false triggers from pets.

- **Flexible Installation**

**Adjustable Mounting Height:** 1.5m to 3m, allowing versatile installation options to suit different room configurations.

## Pet immune optics

The Capture PET detector features advanced pet immune optics, making it an ideal choice for homes with large animals.

This innovative system utilises a double-stacked optical design, which inherently provides pet immunity through sophisticated shape discrimination.

The dual-layer optics are engineered to distinguish between the shapes and movements of pets and potential intruders, ensuring that your pets can move freely without triggering false alarms.

## Reliability you can depend on

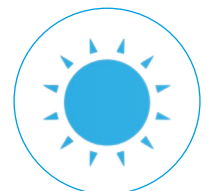

Texecom understand that reliability underpins the fundamental trust in an intrusion alarm system and has developed the Capture range to be our most reliable, most resilient, most robust and most trustworthy range of motion detectors, to date.

Superior pet immunity

Digital temperature compensation

Active white light rejection

Front-loaded fully sealed electronics

Flexible mounting points

Adjustable terminal block

Automatic wireless setup

## Install in seconds

Speed up your installations and save valuable time with the Capture PET. Designed with installers in mind, it features a range of user-friendly elements that make installation and commissioning quick and easy.

## Applications

- **Living Rooms:** Monitor large open spaces where your pets spend most of their time.
- **Hallways:** Keep an eye on the main passageways without worrying about false alarms from pets.
- **Bedrooms:** Ensure security in sleeping areas while your pets enjoy their comfort.
- **Offices:** Protect home office spaces while allowing your pets to stay by your side.
- **Garages and Basements:** Monitor additional areas of your home, providing a comprehensive security solution.
