

Precision Detection, Enhanced Security

The Capture C15 Curtain PIR Detector is designed to offer precise and reliable protection for residential, commercial, and high-value environments.

Whether it's securing windows, safeguarding garage doors, or protecting high-value items, the Capture C15 provides the ideal solution.

Key Features and Benefits:

- **15m x 2m Coverage** : Cover a specific, narrow detection area - ideal for windows, doorways, or creating a protective curtain for high-value assets, ensuring comprehensive security where it's needed most.
- **Quad Element Pyro Sensor** : Ensures precise detection and minimises false alarms, providing reliable security.
- **Wired and Wireless Models** : Enjoy the flexibility to choose between wired (C-15) or wireless (C-15-W) options, making installation suitable for any site configuration.
- **Easy Installation** : Benefit from hassle-free setup, identical to the entire Capture range, ensuring faster installations without compromising quality or accuracy.
- **EN50131-2-2 Grade 2** : Complies with industry standards for security systems, ensuring high-quality performance and reliability.

Curtain Lens Technology

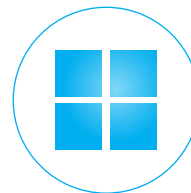

Curtain lens technology creates a narrow, 'curtain-like' detection zone that focuses on a specific area, rather than covering an entire room. The lens is designed to capture movement only within a narrow beam, ideal for monitoring windows, doorways, or other high-priority entry points.

When an intruder crosses this invisible curtain, the sensor is triggered, immediately alerting to a potential security breach. This focused detection minimises false alarms from movement outside the target area and provides greater control over the space being monitored, making it perfect for precise perimeter and entry-point protection.

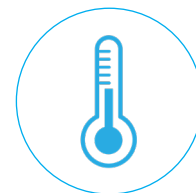

Reliability you can depend on

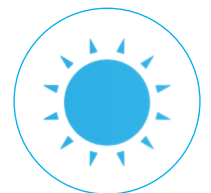

Texecom understand that reliability underpins the fundamental trust in an intrusion alarm system and has developed the Capture range to be our most reliable, most resilient, most robust and most trustworthy range of motion detectors, to date.

Quad pyro technology

Digital temperature compensation

Active white light rejection

Front-loaded fully sealed electronics

Flexible mounting points

Adjustable terminal block

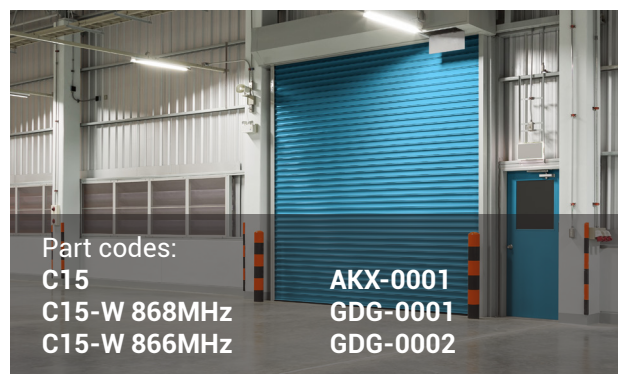

Automatic wireless setup

Install in seconds

Speed up your installations and save valuable time with the Capture C15. Designed with installers in mind, it features a range of user-friendly elements that make installation and commissioning quick and easy.

Applications

- **Residential Windows** : Ensure that every window in the home is fully protected from intruders.
- **Perimeter Detection** : Create a protective barrier for the boundaries of any property or specific areas within it.
- **Garage Doors** : Secure garage entrances to safeguard vehicles, tools, and other valuable items.
- **High-Value Item Protection** : Focus on protecting individual high-value items with precise detection and monitoring.
- **Museums & Art Galleries** : Provide discreet, highly targeted protection for priceless artifacts, artworks, and exhibits without intruding on the visitor experience.
