# **WISE**NET X PLUS

2MP/5MP NW Modular Camera

Faster installation x Reduced costs Advanced performance x Multiplied values

Hanwha Techwin

FIRST EDITION 2-2019

# **WISENET X PLUS**

# The most powerful chipset WISENET 5

Wisenet X series is supercharged by the most powerful chipset ever incorporated into a full camera range. The Wisenet 5 chip uses an all-new architecture that enables faster processing. That means you get the best video performance just as you need it.

#### Easy installation with modular structure and motorized PTRZ

Wisenet X PLUS cameras offer easy installation with their modular structure and motorized PTRZ. The product package has been renewed to save time and money in installation and maintenance.

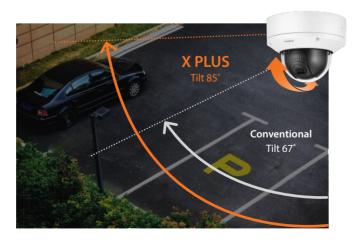

**Installer friendly package:** Easy to pre-network configuration

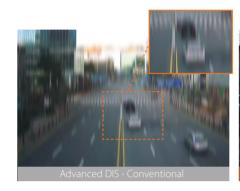

# **Extended tilt range for greater flexibility**

Extended tilt angle has been added for greater flexibility in placement and use cases of Wisenet X PLUS cameras.

# Advanced DIS and shock detection with built-in gyro sensors

Wisenet X PLUS cameras have built-in gyro sensors to enable advanced DIS with reduced motion blur and shock detection which detects when the camera is hit.

### High reliability in challenging environments

One of the most important features of a security camera is reliability in challenging environments. Wisenet X PLUS cameras offer high reliability by providing resistance to weather and impact with IP67, IP66, IP6K9K, and IK10+ ratings.

# Audio playback on event

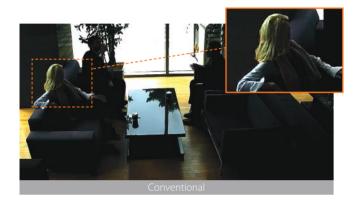

Audio playback feature responses to user-defined events to assist operators communicate with the public.

# **WISENET X PLUS**

## True WDR performance(150dB)

Conventional WDR captures images by taking 2 frames taken at different exposures, whereas Wisenet X series cameras utilize 4 frame capture at different exposure levels to create a combined image. With the development of cutting-edge WDR technology, Wisenet X series cameras address a limitation found in conventional WDR cameras while producing clear and vivid images.

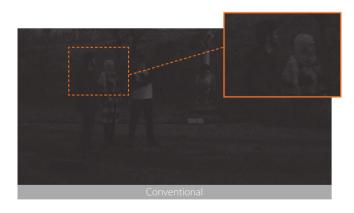

• 150dB WDR only available in 2MP X series

#### Clearer, sharper images in low light environments

Wisenet X series achieves optimal performance in low-light conditions by capturing and producing crystal-clear images regardless of the environment or time of day.

### **Fog Detection**

Wisenet X series delivers outstanding image quality in foggy weather with Fog Detection. Any change in an image is automatically deleted with the defog function to provide a clear image.

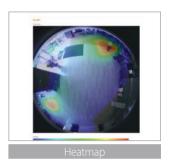

## **Enhanced video and audio analytics**

Wisenet X series support a variety of exclusive Video and Audio Analytics, providing enhanced monitoring solutions and market intelligence.

#### People counting and Heat map

The Wisenet X PLUS cameras have a business intelligence function that offers retailers the opportunity to measure store efficiency. People counting and heat map applications display hotspots within a store, which allow marketing personnel to identify the busiest times of the day, helping them manage customer flow and understand buying patterns.

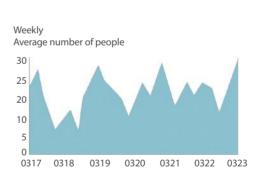

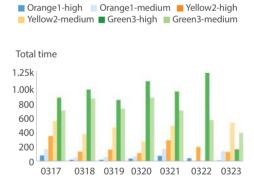

#### Queue management

This feature provides statistical analysis and measurement for average dwell time and number of people in queues. This insight is critical for business to manage their operations more efficiently, while providing the insight necessary to manage campaigns, displays and promotions throughout retail locations.

#### Sound classification

Wisenet X series camera help user respond immediately in case of situation in danger, so that can classify sound such as gunshot, glass breakage, scream and explosion.

# Improve bandwidth by up to 99% using WiseStream ${ m II}$

Using WiseStream II, **Hanwha Techwin's** original video compression technology, the Wisenet X series reduces data by up to 99% compared to current H.264 technology, when combined with H.265compression. System costs are also greatly reduced without comprising image quality. Wisenet X series cameras address a limitation found in conventional WDR cameras while producing clear and vivid images.

WiseStream II OFF: 7260kbps WiseStream II ON: 1817kbps

#### **Handover to PTZ**

The handover feature allows a PTZ camera\* to receive an alarm(motion detection) from Wisenet X series camera operating on the same IP video surveillance system. Once the notification is received, the PTZ camera will zoom into the assigned camera pre-set location. This feature improves the efficiency of the surveillance system by decreasing the reliance on the system operator on tracking events, and by increasing the likelihood that critical events in a surveillance area will be captured and recorded. \*\*PNP-9200RH/XNP-6370RH

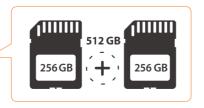

#### **Dual SD slots**

Dual SD slots allow up to 512 GB to be saved automatically to the camera, keeping data safe in the event of an unstable network. Obviously this allows to record more video footage than single SD slot.

## **Optional accessories for various applications**

A weather cap and the skin covers available in black and ivory would blend in with the surroundings of different kinds.

• Weather cap(XNV only) and ivory skin cover(XNV and XND) are included in product package. The weather cap can not be applied with the skin cover on.
